la libertà di associazione dei lavoratori e riconoscere il diritto alla contrattazione collettiva

ELIMINARE
tutte le forme di lavoro forzato e obbligatorio

SRADICARE
effettivamente i minori

PROMUOVERE
l’eliminazione di ogni forma di discriminazione in materia di impiego e professione

SOSTENERE
un approccio preventivo nei confronti delle sfide ambientali

INTRAPRENDERE
iniziative che promuovano una maggiore responsabilità ambientale

INCORAGGIARE
lo sviluppo e la diffusione di tecnologie che rispettino l’ambiente

CONTRASTARE
la corruzione in forma, indiretta e le tangenti

10 PRINCIPLES and SUSTAINABLE SUPPLY CHAIN MANAGEMENT
Sustainable supply chain management is based on a responsible, social and environmental management as well as economic, of all procurement, production and distribution processes initiated directly by the firm or indirectly through its suppliers.

Environmental, social and economic impacts occur during every stage of supply chains. In addition, governance, which is how an organization demonstrates accountability for its conduct to its stakeholders, is important at every stage.
SDGs and SUSTAINABLE SUPPLY CHAIN MANAGEMENT

1. No Poverty
2. Zero Hunger
3. Good Health and Well-being
4. Quality Education
5. Gender Equality
6. Clean Water and Sanitation
7. Affordable and Clean Energy
8. Decent Work and Economic Growth
9. Industry, Innovation and Infrastructure
10. Reduced Inequalities
11. Sustainable Cities and Communities
12. Responsible Consumption and Production
13. Climate Action
14. Life Below Water
15. Life on Land
16. Peace, Justice and Strong Institutions
17. Partnerships for the Goals
SUSTAINABLE PRODUCTION and CONSUMPTION: a LINK to reach several other GOALS and TARGETS

The Global Compact Network Italia Foundation’s «Sustainable Supply Chain» Working Group, composed mostly of CSR and Procurement managers from different corporate realities, was created in 2013 with the following aims:

- To develop a self-assessment questionnaire, shared among participants, to measure the sustainability of their suppliers in terms of human rights, labour, the environment, and anti-corruption;
- To encourage spreading the principles of sustainable development among suppliers by promoting the use of good practices;
- To monitor and reward the improvements made by suppliers;
- To establish a transparent sharing of results between Partners.
TENP: the CONCEPT

- To publish the questionnaire on the WEB;
- To host the application on the GCNI portal to preserve the «fair» nature of the project;
- To involve a large number of suppliers through mass mailing tools;
- To make the results easily accessible, self-explanatory and downloadable;
- To make easy results analysis tools available to partners for multiple variables (industry, country, size, etc.);
A platform developed by the Global Compact Network Italy Foundation (GCNI Foundation) to support its members in collecting and sharing information on their supplier’s sustainability performances with the aim of:

- Identifying common challenges and solutions to develop more sustainable supply chain practices
- Supporting the promotion of best practices among GCNI Foundation members and their suppliers and contractors
- Structuring a network of experts and creating culture by promoting an ethical way of doing business

The TenP Sustainable Supply Chain Self-Assessment Questionnaire is built around the four areas covered by the United Nations Global Compact (UNGC) Ten Principles also taking into consideration the most relevant international agreements, conventions and standards:

*Human rights  *Labour  *Environment  *Anti-Corruption
Is Drilling questionnaire. It consists of two major components:

- Basic common pre-requisites (IN/OUT)
- Sustainability management evaluation criteria

- **Level 1** – clear and formalized commitment to sustainability and the presence of an advanced tool for reporting on sustainability issues, as well as the absence of negative events connected with sustainability issues over the past 12 months

- **Level 2** – Certifications in place (e.g. SA8000, etc.)

- **Level 3** – Existence of sustainability policies and management & accountability practices

- The questionnaire has to be completed taking into consideration the company as a whole
By filling out the questionnaire, companies will automatically receive:

- an **online scorecard** containing
  - the **four areas scores**;
  - an **overall score** along with the four areas scores;
- a **customizable benchmark tool** (e.g. by sector, country, etc.).

The self-assessment process final score has not to be considered as a merit score awarded or certified by the GCNI Foundation.
The information provided by the company in filling out and updating the self-assessment questionnaire as well as the self-assessment results:

- Will be kept strictly confidential and will not be publically shared or distributed

- Will be exclusively visible to the company that fills out the questionnaire, to the Global Compact Network Italy Foundation Secretariat and, ONLY IF EXPLICITLY AUTHORISED by the company itself, to one or more of the TenP Platform Partners

- Will be used in aggregate form as a statistical basis to support research and benchmarking activities

More than 2,000 suppliers registered on the platform in more than 30 countries all around the world
Introducing **DESKTOP Audit** on common suppliers between two or more partners allows the verification of the data and to avoid the duplication of costs and procedures. In this way:

- the partner will have access to a verified database
- the potential for «false statements» will be limited

At the end of the activity a **Report** will be produced which will be shared between the platform partners offering the possibility to review the overall score of the supplier and the definition of targeted corrective actions.

**Technical Partner**, responsible for the independent review of the completeness and consistency of the information contained in the Platform
TENP: ADVANTAGES for PARTNERS

- Use of the Portal and the information it contains, in the selection, evaluation and qualification of suppliers, at a low cost;
- Limiting the costs associated with audit processes;
- The collection and analysis of information and sustainability performance data of suppliers;
- Extending the process of selecting and qualifying the suppliers, as well as assessing the aspects of social responsibility (SRI/CSR);
- Active engagement tool for suppliers;
- Participation in the continuous improvement and development of the platform;
- The opportunity to form connections with national and international peers in order to: share experiences, processes, and knowledge and to create a new and stimulating network;
- An operational tool to support internal processes such as: selecting and qualifying suppliers, supply management, risk management and prevention (e.g. reducing the exposure to the risk of non-compliance to regulations), and social responsibility;
- Supports corporate image and demonstrates a concrete commitment to sustainability.
TENP: ADVANTAGES for SUPPLIERS

- Available **cost-free**;

- Designed for businesses of **any size, business sector and operating anywhere** in the world;

- **Support for the sustainability strategies and performance** self-assessment processes;

- Progress **monitoring tool**;

- Opportunities for **performance benchmarking** with competitors, aiming for continuous improvement;

- Complete **control of own data**;

- **Corporate data and performance visible to more potential customers** at the same time = TenP platform partners;

- **Opportunities to connect** with a new network of national and international actors such as the GCNI Foundation and the Global Compact;

- Continuous **technical and professional support** with access to favourable professional training offers.

</tr>
</tbody>
</table>

*The membership fee includes: use of the TenP platform and related services (possibility of involving suppliers by mass mailing from the platform itself, possibility of analysing and extracting the data present on the platform, first level support offered by the GCNI Foundation to the suppliers; possibility to actively contribute to the development of the tool, in accordance with its common needs and strategic interests; proof of partner affiliation with the company partner logo on the home page of the platform and on all their promotional materials.*

It will also be possible to activate tailor-made training/support courses for suppliers, as well as awareness raising courses internal/external to the organization. The cost will be determined on the basis of the extent of the project.
Thanks to the agreement signed between the GCNI Foundation and Bureau Veritas, TenP Platform partners may make use of their auditing services at competitive prices. The cost will vary according to: the firm’s annual turnover; number and type** of desktop audit.

** Audit 1. **The verification activity will be conducted without interaction with the audited suppliers, limiting the verification to documents uploaded to the TenP platform and to a search on the web for statements made by vendors. In particular, we will proceed with an Audit 1 where the supplier has one or more certified management systems - LEVEL 2 of the TenP questionnaire -; with an Audit 2 where the vendor does not have certifications - LEVEL 3 of the TenP questionnaire included - (see slide: TenP, the questionnaire for more information on LEVELS). The Audit 3s, in addition to what is described for Audit 2, are also in a phase of interaction with suppliers (telephone/email) to collect evidence to corroborate the answers given, for which the uploading of documents by the platform is not provided.
